Andrew Ross is sabotaging my case, and I have uploaded the evidence of his criminal and professional misconduct. I want the defense consortium to get off my case, and to conduct an investigation. I want an attorney assigned from out of county or a change of venue.

I asked Andrew Ross to put in for a change of venue and the asshole refused to do it. It's my case, and he has a relationship with the DA that is telling me that he is protecting the guy and is doing all this abuse deliberately. I recorded all the conversations between us, including Andrew ross hanging up and abusing me on the phone.

The documents and files can be downloaded there. He is also involved in causing physical injuries to me, and he says he doesn't have to protect me from police/state abuse that I am going through. He is letting them hurt me, refusing to hire the expert witnesses and private investigators to investigate my case, etc.

The Defense Consortium was notified of these issues. It's your duty to get this retarded fuck of an attorney off my case so I can get the work done that's supposed to be done, and so I can go to court and defend myself.

This little bitch does not respond to communications and does not listen to anything I say. He's doing all this on purpose to help the state and CIA behind my back.
