Dear Sid Matthew,

Left you a voicemail, from "Todd Giffen" 503-967-5202 / obamasweapon.com.

If you are the Sid Matthew representing the Aaron Alexis family I wanted to let you know that, as you know, inside the DOD is a juicy weapons system built into radar and satellite systems. It can target any point in space, impinging the target, a human, or other source, with very complex waveforms, meant to fully remotely control, and hurt.

Aaron may or may not have been a target.

But the further you press into this matter, the most evidence you can obtain.

I have already gathered the best information on this issue on my website. I have patents covering the multi-functional radar systems, mentioning biological targets. I have the mind reading/mind altering patent for military radar. I have the audio interviews with DOD/CIA/US DOJ/NASA scientists blowing the whistle on this technology, confirming it's existence.

I have something else for you. A USIS employee, yes.. the Same organization that did the background check on Aaron Alexis, an employee of this organization confirming that they have paperwork and information there confirming this weapons existence. She was an intern there in 2003, and the intelligence she saw was about remotely tapping people brains, and being able to beam voices into their heads. Listen to her confirm that here: <http://www.oregonstatehospital.net/d/USIS.html>

What this proves is that FBI knows it's real, USIS knows it's real, and they both refused to admit it after the incident with Aaron Alexis claiming the technology was not real or just claims by conspiracy theorists..

The US government has went so far to deny they did this to Aaron, to cover it up, to even sue USIS, which is obviously a game to go all lengths to lie about this. It is the ultimate lie because most US DOJ/FBI/CIA/NSA/DOD/local/state governments know that this type of surveillance / weapon system is in use all around us.

Basically: they got radar with ground, building, and body penetrating interferometry/tomography, they can watch you as an Attorney in your office. Monitor your evoked potentials, decode your thoughts, monitor your vitals and pulse and breathe, and see exactly the shape of your body and what you're doing and where you're at. Interferometry works many ways, passively and actively, but in active mode they can focus microwave energy into a person, to kill and mess with them. These systems are multi-purpose, for assault, murders, mind control, covert communication, etc.

It's a global system.

Learn about it here: <http://www.oregonstatehospital.net/d/story.html#nsabrainlink>

The technology Aaron may have been saying the Navy used on each ship may have been built into their radar systems, or may have been the LRAD system: LRAD dishes are built by contractor American Technology Corporation, and you can download two WikiLeaks documents covering this technology here: <http://oregonstatehospital.net/d/otherfiles/LRAD%20Military%20Sound%20Weapon/>

Basically. Aaron may have thought those devices were being used to attack him or something else.

But he's on the right path. This is done by NSA, US Air Force, US Navy, US DOD, FBI/CIA satellites. and they have ground based phased array antenna, like HARRP, HIPAS, Puerto Rican Radar field, Bazillion Radar field, dozens of these platforms that use the ionosphere like a giant mirror, bouncing signals through the sky down onto a target, pointed over the United States.

These radar fields are giant neurological weapons, can create and diffuse tornados, can create earthquakes, track missiles, track planes, track humans, watch people in their homes, etc.

It's bigger than Snowden because it's done in Special Access Programs, Exceptionally Controlled Information programs, and Very Restricted Knowledge programs, in the black world.

But black world, sometimes includes even the street cops who are meant to protect us, who have full access to the system. And it goes as high as the governors and up to the President, and, most people are secretly using this every day.

I have no doubt even yourself is a target. The technology is used to know everything, give prosecutors insights, no need to file for a warrant to spy on you because it's all done in secret, and then they just won't tell you they know everything about you. While the court process is rigged, jurors are manipulated, and no one goes to jail or gets in trouble for doing any of it.

Yeah I know it to be true that this is a murder and rape game to them amongst their ranks, and they're at least lying about the weapons system to do it not being real.
