Why do you let people in the mental health system get hurt, and used in military experiments?

So the military and government has a long history in using citizens in military experiments who are in psychiatric hospitals, like the Oregon State Hospital. The abuse has gone on for decades, even children would be kidnapped, raped, drugged, electroshocked, dosed with radiation, and traumatized. The doctors behind these attacks specialize in mind control, creating disorders in people, and sabotaging victims for the government.

My website fully documents decades and hundreds of thousands of victims, plus my recent case that has been going on now for 10 years.

There is something you should know. Disability Rights Oregon and those in your office with ties to Oregon are fully involved, allowing the state of Oregon and federal government to do this, refusing to act, covering up peoples abuse.

Many patients within the State of Oregon claim DRO will do nothing no matter what abuse a patient faces in this facility, and they know that the facility employs a full government run mind control program.

DRO even participated in the US DOJ surveillance scandal, and participated in my murder attempt to cover it all up. They let the doctors hurt me on purpose to cover their tracks.
