1. Introduction

Products listed below have been tested according to the German Zoning Procedures by BSI (Federal Office for Information Security) or test houses accredited by BSI and tested according to the SDIP 27 Level A procedures.

No tests to meet other security criteria e.g. ITSEC, COMMON CRITERIA, ORANGE BOOK have been performed.

Listed products have been tested within the last 6 years. Products tested more than 6 years ago are removed from this list but they can be used further on within the assigned zones. Inquiries for detailed information about these removed devices are addressed to BSI.

This list is provided and updated by

BSI - Federal Office for Information Security

(Bundesamt für Sicherheit in der Informationstechnik)

2. General

The measurements for SDIP27A-Equipments (Chapter 3) which are based on the NATO SDIP 27 Level A-procedures.

The German Zoning Procedures which are based on the NATO Zoning Procedures, allow Zone 1 and 2 (NATO) and Zone 3 (German specific) to be assigned to a product. Zone 1 to Zone 2 corresponds to Equipment TEMPEST Zones 1 to 2 of SDIP 28 (former AMSG-799). E.g. "Zone 1-3" in the column "Approved for" means: the product can be used in the German- or NATO-Facility Zone 1, 2 and in the German specific defined Zone 3. The determination of the NATO-Facility Zones is given in SDIP 28.

- "COTS" in the columns "Note" or "State of Production" means that it is a "Commercial Off the Shelf"- Product. In the column "State of Production" the serial numbers of the tested equipment are given.

- Fixed and frozen technical design and quality control with Zoning Short Test Procedure:

If the manufacturer or modifying company agrees and engages to fix and freeze the design of the equipment and/or to use the German Zoning Short Test Procedure for the quality control of each produced equipment, this will be noted in the column "Note" of the products list.

By using these means, the emanation characteristic of a product can be controlled and a great deviation of the emanation which could affect the Zone classification can be avoided.

- According to German regulations all equipment approved to the Zoning Concept has to be retested individually before being used for processing Classified Information. This retesting is necessary after production, maintenance and repair by using the German Zoning Short Test Procedure.

Note: these tests have to be ordered/contracted separately. Inquiries for Laboratories which are accredited for retesting with this procedure can be addressed to BSI.

- Before connecting a chosen equipment to a crypto device, the responsible National TEMPEST Authority should be consulted.
- It should be noted, that the interconnection of zoned equipment not necessarily meets the same Equipment Zone as each single equipment.

3. SDIP 27 Level A-Equipments

The following lists are containing the SDIP27 Level A-Equipment / Devices manufactured by the named companies.

This Equipment / these Devices can be used without any additional specifications in all Zones.

The groups are:

3.1 PC-Systems and

3.2 Peripherie-Devices

3.1 PC-Systems

3.1.1 Personal Computers

4. Equipment tested against the NATO Equipment Zoning Procedures

The following German Zoned Products List is structured as follows:

- 3.1. Data Processing Equipment
 - 3.1.1 PC-Systems
 - 3.1.2 Laptops, Notebooks
 - 3.1.3 Terminals, Monitors, Displays, Keyboards
 - 3.1.4. Workstations
 - 3.1.5. Other Data Processing Equipments
- 3.2. Typewriters
- 3.3. Peripheral Devices
 - 3.3.1. Printer
 - 3.3.2 Plotter
 - 3.3.3. Other Peripheral Devices
- 3.4. Other Devices (e.g. Telephones, Optical Switches)

Note: in the headers of the following tables is the meaning of

ZONE = approved for use within Facility Zone

DATE = Date of test

STATE = State of production
